OBJECTIVE

Junior AI/ML Developer with hands-on experience in Machine Learning, Deep Learning, and Generative AI using Python, TensorFlow, PyTorch, and Scikit-learn. Experienced in building real-world AI systems like RAG-based chatbots and NLP applications. Seeking to contribute to scalable AI solutions, model development, and deployment in a growth-oriented organization.

SKILL

- Programming Languages: Python, SQL, C++
- AI / Machine Learning: Regression, Classification, NLP, Model Evaluation, Scikit-Learn
- Generative AI: LLMs, RAG, Prompt Engineering, LangChain, Vector Databases, Embeddings
- Deep Learning: TensorFlow, PyTorch, Keras
- Visualization & Reporting: Power BI, Matplotlib
- Databases: MySQL, Database Design, Query Optimization
- Web Technologies: HTML, CSS, JavaScript, PHP
- Cloud & Tools: AWS EC2, Git, GitHub
- Libraries: Pandas, NumPy, Scikit-Learn, TensorFlow, PyTorch
- Data Engineering: Data Cleaning, ETL Pipelines, Data Handling, Analytics

PROJECTS

AI Insurance System (RAG):

- Built a Retrieval-Augmented Generation (RAG) based AI chatbot for insurance domain queries. Integrated LangChain, LLMs, and vector database for contextual response generation. Improved document-based search accuracy and reduced manual query handling ML Model Deployment using Flask .

CNG Fuel Management System

- Developed a web-based CNG Fuel Management System using PHP, MySQL, HTML, CSS, and JavaScript. The application manages fuel entries, billing, customer records, and reporting functions in a structured database-driven workflow. It improved operational efficiency by digitizing manual fuel management tasks.

Exam System

- Designed and implemented a database-driven online exam platform with role-based access for students and administrators. The system supports exam creation, student data handling, result processing, and automated record management. It streamlined examination workflows and reduced manual effort in result handling.

Mental Health Chatbot

- Created an NLP-based chatbot designed to provide basic mental health support through intent recognition and response generation. The bot processes user inputs and returns relevant replies using natural language understanding techniques. This project demonstrates practical application of NLP in a supportive conversational system.

WORK EXPERIENCE

Earth Logicware Technologies (AI/ML & Software Development Intern)

- Designed and managed relational databases for efficient data storage and retrieval
- Implemented Python-based automation scripts to optimize backend workflows
- Assisted in debugging and performance tuning of production-level applications
- Supported AI/ML data preprocessing and workflow integration
- Collaborated with developers to improve system reliability and scalability

Kolhapur, Maharashtra
Aug 2025 - Present

CERTIFICATION

Generative AI & Prompt Engineering — AptTech Solutions | 2026

- Gained hands-on experience in LLMs, RAG architecture, and prompt engineering for AI applications.

Artificial Intelligence — SmartBridge | 2026

- Acquired practical knowledge of core AI and machine learning concepts with real-world exposure.

Applied Data Science – SmartBridge (Google for Developers) | 2026

- Completed Applied Data Science training, including data analysis, machine learning concepts, and practical project implementation .

Cloud Practitioner – SmartBridge | 2026

- Successfully completed a Cloud Practitioner course covering cloud computing fundamentals, services, and practical project

EDUCATION

D Y Patil Agriculture and Technical University
B.tech in Computer Science Engineering(Data Science) CGPA: 9.04/10.00

Talsande, Kolhapur
2023 - 2026

Dr. Bapuji Salunkhe Institute Of Engineering And Technology
Diploma in Computer Science Engineering Percentage: 76.11%

Kolhapur
2020 - 2023
